

Introducing:

KICHEKO BROADBAND

Kicheko Ltd is proud to announce its new service called "Kicheko Broadband" which is a Wi-Fi system using the 802.11b/g protocol standard with full access to e-mail, internet and voip services like net2phone and skype at the most affordable rates.

What's the difference? ...

Kicheko Broadband service is different from other traditional wireless systems in that it is available everywhere in the signal coverage area like a cloud.

In those areas with signal coverage, one has just to open and put on a Laptop computer, palmtop computer, PDA, desktop computer or wireless phone with a Wi-Fi 802.11b/g enabled wireless card built in or attached to it and the network will be detected immediately.

Once detected you only need to double click the wireless icon on the system tray and follow the instructions which appears on your computer depending on the type and version of the

operating system you are using. For Microsoft Windows XP with Service Pack 2 you just need to click OK and the connection will be established instantly. To facilitate easier and faster connection, the service has not been encrypted and therefore connection is immediate.

Kicheko Broadband Advantage...

There are at least seven reasons why you should join Kicheko Broadband today...

1. **Modern technology** – Wi-Fi is the wireless technology of the future for internet connectivity. Almost all new Laptops and PDAs are equipped with an inbuilt Wi-Fi network card for instant connection. It's easy, fast and reliable;
2. **Roaming** – just like a mobile phone once connected through Wi-Fi you can move around without losing your connectivity. Just imagine that with the same Laptop and same account you can connect while in the office and at home;
3. **Quick and friendly service** – the Wi-Fi technology will get you up and running inside 15 minutes of your decision to join. It's that easy and fast;
4. **Easy and cheap to join** – there are no contracts to sign, no wires for cabling, no telephone line required, no mast, and as if that is not enough there is also no connection fee;
5. **Good price** – you can choose any of the access price plans you wish – 30 mins, 1 hour, 2 hours, 4 hours, 1 day – by access codes; or 1 week, 1 month, 3 months, or 6 months by getting a user name and password from Kicheko;
6. **Special price for Students and Corporate clients** – there are special discounted prices for students and corporate clients buying access time for their employees;

7. **High speed and reliable connection** – facilitated by redundant bandwidth with direct connection to US internet backbone.

A complete range of ISP Services

Our staff understands Computers and the Internet, it's our business!

Other services offered by **Kicheko** include:

- Dial-up access service;

TANZANIA

How do I pay?

After connection to "kicheko-broadband" network the next step is to call a page from the internet and the Kicheko Broadband Welcome screen will come up with access options:

1. The first option is to key in your "username" and "password" for those regular users who want access for a week, a month, three months or six months;

2. The second option is to type an "Access Code" which can be bought at various points all over Moshi town including Hotel receptions. Access codes are available for 30 minutes, one hour, two hours, four hours and one day. The rates are quite affordable;

3. The third option is self registration through an integrated "Paypal" and "Credit Card" payment system which is one of the world's most secure online payment system with more than 100 million accounts worldwide.

Final word...

Kicheko Broadband can help to reduce your internet and email communication budget, and can also save you the cost and hassle of striving to reach your mail while on the move or away from the office.

We are conveniently located along Mawenzi Road near Bora Shoes and opposite Old CCM.
